## About Us

Founded in 1989, TELE-PAPER Malaysia, is currently the largest ISO 9001 and ISO 13485 certified direct thermal and thermal transfer products manufacturer in South East Asia. Backed by more than 29 years of experience in the thermal paper industry, TELE-PAPER has grown into a full fledged thermal products manufacturer, operating from 2 factory sites, spanning across 40,000 square meters, with over 20 printing presses and over 40 high technology slitting machines.

Our FSC certified and CE approved products have further strengthened our global brand presence, to more than 130 countries worldwide. Our technology driven manufacturing capabilities and sound technical know-how have garnered us OEM partnerships with several international corporations and won positions as their preferred supplier. TELE-PAPER is always at the forefront, in identifying, developing and introducing new BLUE OCEAN products to enable our customers to compete effectively in whichever markets they are selling in.

<https://www.youtube.com/watch?v=E1zDj7K4QUA>

## Our capabilities include manufacturing and printing of:

- ▶▶ Point of Sales (POS) Receipt
- ▶▶ Label
- ▶▶ Ticketing
- ▶▶ Self-Carbonised Paper / NCR Paper
- ▶▶ Wide Format & Inkjet Photo Paper
- ▶▶ Thermal Transfer Ribbon
- ▶▶ Medical Paper & Gels

## Our strengths

- + We stock a wide range of thermal paper in various grades standard, long life, BPA-free and FSC certified coated thermal papers for end user applications such as Point of Sale (POS) / Banking / Ticketing / Medical / Gaming / Labelling
- + Fully automated manufacturing facilities and computerised quality control systems to ensure consistent quality
- + Operational and line flexibility to respond to upsurge in demand or urgent orders
- + ISO & CE compliant OEM manufacturing standards and capabilities to handle tight production tolerances
- + Approval by global OEM manufacturers - testament to our capabilities and quality consistency
- + Pre-printing up to 9 colours in vibrant semi glossy ink
- + Fine, detailed and complex artwork including security features on thermal, woodfree, art paper and NCR paper
- + In depth technical knowledge and expertise to meet customers preferences / requests
- + Very experienced and capable sales team to advise customers on sales strategies and cost saving proposals
- + Leverage on our worldwide shipping network for lower shipping cost
- + Multiple site dropship deliveries to any destination worldwide, reducing customers' shipping costs and paperwork
- + Supports loose pallet as well as full container load shipments to any sea ports, inland ports or delivering direct up to warehouses
- + Heat protective or secure export packaging or fumigated packaging are possible
- + Reliable supply and on time delivery

## Quality Policy

Continuous improvement in total customer satisfaction on quality products and on time delivery. Provide safe, quality products which meet customers and other related regulatory requirements.

## TELE - PAPER GLOBAL NETWORK

Tele-Paper is presents in more than 130 countries worldwide

## Finding Your Paper Security Solution

### Fraud and forgery prevention

Even in today's hi-tech digital era age, forgery continues to proliferate and cause untold losses to organisations; big and small alike. Counterfeiters are constantly finding new ways of escaping detection, making it an uphill challenge to keep those with criminal intent from being caught. Which is why over the years we have developed unique solutions to make counterfeiting more difficult. Increasingly complex printing is being incorporated on paper and documents. Our technology is unique unlike any other; more importantly, it works against forgers!

### Security Method

The strongest protection against forgery is achieved by using a combination of the following methods:

#### Scratch Reactive Ink

An invisible security ink layer covers any printed element, textual or graphic. Exposed only by scratching the ink with a coin or other metal object.

#### Micro Coding

The Micro Coding encrypted documents can only be decoded by a firmware programmed onto a handheld security IR Reader with audio verification.

#### Hologram / Foil

Hologram / foil provides a mark of authentication on a product, making it more difficult for counterfeiters to sell fake ones

#### Microtext / Microprint

Microprinting involves printing very small text, usually too small to read with naked eye.

Applied  
on paper

#### 2D / 3D Barcode

2D / 3D barcodes utilises a combination of encoded characters to provide optimum document authentication that is almost impossible to duplicate

#### Invisible Photocopy Mark

Invisible to the naked eye. When photocopied or scanned, this invisible addition becomes visible and very noticeable

#### UV Invisible Mark

Invisible UV Ink that is only visible under UV light

#### Applied Inside Paper

##### Security Water Mark

- To verify the document is an original, hold it up against light to view the water mark. (minimum paper grade 80gsm)

In addition, you can differentiate between characteristics which can be identified by sight or touch, characteristics which require the use of a simple checking device or characteristics which require high-tech equipment. Whether or not all three layers of security are required, needs to be assessed for each individual customer / end user, depending on the value of the product and its application.

## Why do I need security measures?

Most companies are reluctant to reveal the impact of forgeries in order to protect their reputation. To be one step ahead of the forgers, we use a combination of security features to make our products almost forgery proof.

### Which security feature is suitable for you?

Paper Type	Features							
	Micro Coding	Microtext / Microprint	Invisible Photocopy Mark	UV Invisible Mark	2D / 3D Barcode	Hologram / Foil	Scratch Reactive Ink	Security Watermark
Thermal	✓	✓	✓	✓	✓	✓	✓ (Uncoated Side)	-
Woodfree	✓	✓	✓	✓	✓	✓	✓	✓
Artpaper	✓	✓	✓	✓	✓	✓	✓	-

\*\*One or more security features can be combined

Contact our sales personnel for further info on paper grades, individual solutions and security features available from our sales department

### Material & Application

We provide one-stop security materials and printing solutions.

#### • Thermal Paper

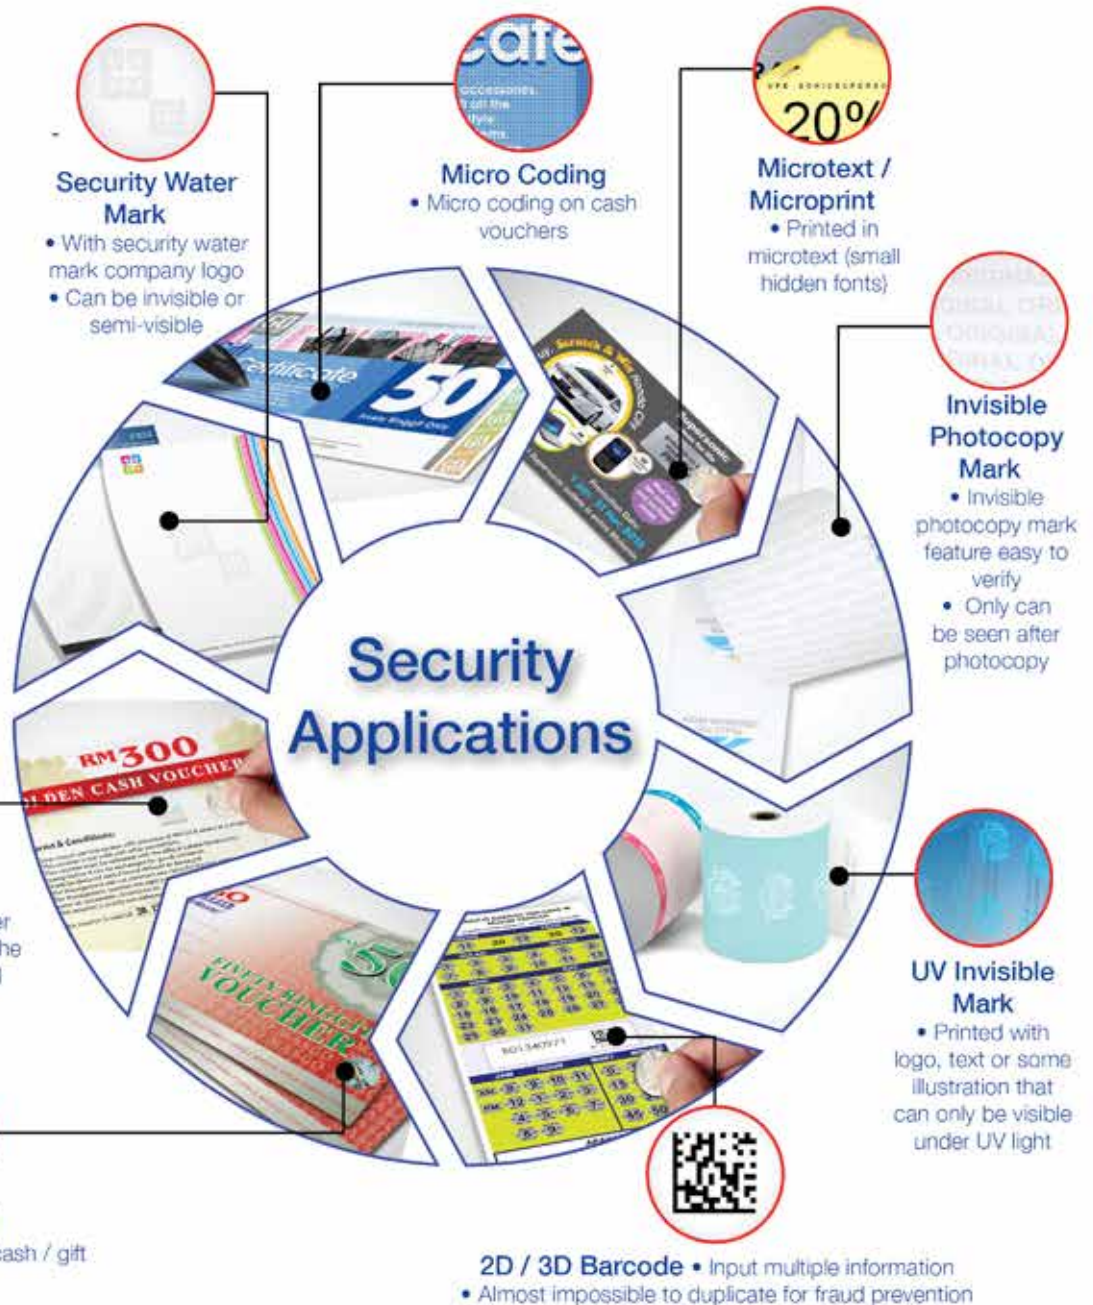

Application examples :  
Gaming & Lottery, Concert Ticket, F1 Ticket, Entrance & Admission Ticket, Transport Ticket, Parking Ticket, Entertainment Ticket, Boarding Pass

#### • Woodfree

Application examples : Cash / Gift Voucher, Letterhead, Ticket, Coupon, Toll Receipt

#### • Artpaper

Application examples :  
Cash / Gift Voucher, Scratch Coupon, Entertainment Ticket, Entrance & Admission Ticket,

Paper Roll

# Placing An Order for Paper Roll

For thermal, woodfree & NCR paper roll enquiries, please provide the following details:

1. Width (mm)
2. Outer diameter (mm) / paper length (M)
3. Type of core - paper core, plastic tube core, plastic honeycomb core or coreless
4. Inner core diameter (mm)
5. Core thickness (mm)
6. Paper weight (gsm)
7. For thermal paper - coated side in (CSI) or coated side out (CSO)

6. Paper weight range from 48gsm to 150gsm

**Free End Roll**

Paper rolls are wound with a free end without glue or tape to prevent printer paper jam at the end of the roll.

**Paper Roll Packaging**

All paper rolls are packed in transparent shrink wrap for easy viewing of the roll & core diameter and also to protect the rolls from moisture, water & dust.

**Carton Box Printing**

Each box is printed with the lot / batch number, date of production, weight & paper grade.

**Barcode Label**

Each box is printed with barcode label for better inventory control.

**Side Roll Marking (Optional)**

Inkjet printing on diameter side.

# Coreless Roll

Don't pay money for an unnecessary core!

If there is no plastic or paper core, these are known as coreless paper rolls and typically will have a centre hole of 10mm diameter.

By eliminating the plastic or paper core, we are able to put more paper on a roll. This means fewer changeouts and higher productivity for cashiers who are using mobile payment terminals.

## Going Green, Going Coreless Advantages of coreless paper roll

### Convenient & Time Saving

User can replace new roll into the printer without removing and throwing the core, saving time and enhancing cashier productivity especially during peak hours

### Environmental Friendly

No disposal of unwanted paper or plastic core into our Earth

If opt for same paper length with current purchase :

### Save Transportation Cost

The size per carton box is much smaller and lighter, hence a saving in transportation cost. For overseas shipment, the container shipping and delivery cost will be significantly cheaper

If opt for same paper length with current purchase :

### Save Storage Space

Smaller diameter, smaller carton box, smaller storage space. Most cashier areas have limited storage space, by having smaller box will greatly reduce storage space needed

If opt for same roll diameter with current purchase :

### Longer Paper Length

By replacing the core with paper, the paper length is much longer (10-35% longer depends on paper roll size), hence less frequent to change paper roll, saving time and enhancing cashier productivity especially during peak hours.

# Standard Design Pre-Printed Roll

Greeting messages on paper rolls are a polite and meaningful method of communication. Most retailers would even pre-print some colourful designs on their receipt paper rolls for festive seasons such as Christmas, Chinese New Year, Eid Mubarak or just a simple Thank You to show appreciation to their customers. Available in multiple languages.

# Customised Design Pre-Printed Roll

## Why is it important to customise your receipt?

### 1. Receipt saving concept :

By customising the pre-printing of their receipts, Tele-Paper has enabled many companies to have more saving and reduce paper usage significantly.

### 2. Prevent pilferage :

With 1 colour printing on our customer's paper roll, this can prevent the paper rolls from being easily stolen as some customers do not keep track of their paper roll inventory and yet, it is a very costly item.

### 3. Improve company image :

Personalise your receipts with company logo, brand name, business hours, total number of outlets and addresses, or even add promotions to improve your company image while generating more business.

### 4. Need for authentication :

Cheque deposit receipts, kiosk printouts, F1 tickets, transportation tickets, entertainment tickets and apparel, food & beverage receipts are customised and pre-printed for authentication and tax purposes. More and more corporates and retailers opt for pre-printing to improve their branding or reduce fraud cases. This is especially useful when it comes to the exchanging of goods and refunds.

### 5. Communicating with the customers:

Advertise your new products or up coming events, announcing new and upcoming promotions or new outlets opening.

We are capable of pre-printing up to 9 colours across a wide range of thermal, woodfree, artpaper and carbonless paper rolls to suit your specific needs. Our thermal paper ranges from standard, long life, BPA free, FSC certified, synthetic, top coated, high sensitivity, high image density and blue image grades available with either a choice of coreless, paper or plastic core. Customised sizes and packing are also available upon request.

\* All brand names and trademarks are registered trademarks of their respective owners. OEM product names and numbers are for comparison purposes only and do not represent an endorsement from or approval by their owners.

# Start & End Mark

## Customised Start & End Mark

The start and end mark serves as an indicator of the portion of paper to tear off before use and when the end of the roll is approaching. Designs can be customised according to the end user's or dealer's requirements depending on the objective such as, to distinguish between outlets for the end user, or as a reminder to the end users to call the dealer to re-order.

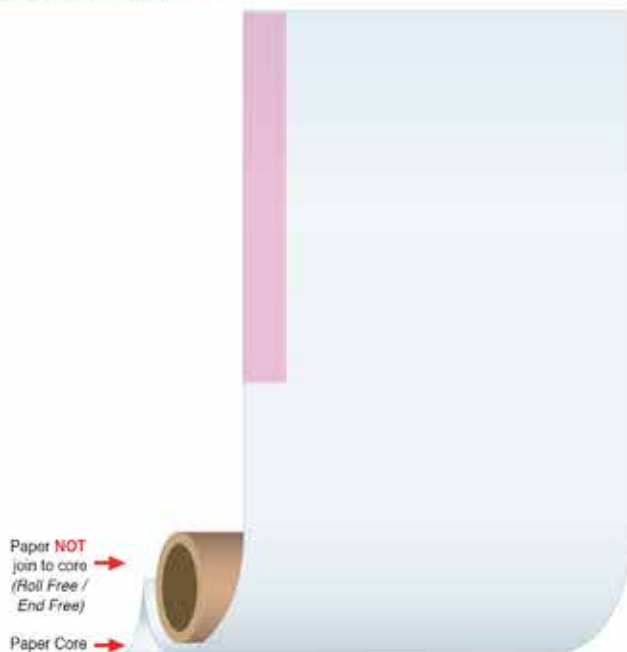

Start & End Mark  
(face out)

Paper NOT  
join to core  
(Roll Free /  
End Free)  
Paper Core

## Standard End Mark

To indicate for the user that the paper is approaching the end of its roll. Applicable to all paper rolls (thermal, woodfree & NCR) without customised end mark.

### Proposal for Customised Start & End Mark

# Tinted Paper Roll

## Distinguish Yourself

Today, thermal paper printing goes beyond its purpose of a receipt. It serves as an effective advertising and promotion medium for businesses. A medium to communicate products/services information and boost brand/name recognition to the public/consumers.

Realising the importance for businesses to stand out from the competition, TELE-PAPER introduces Tinted / Thermal Paper to distinguish yourself and make your business outstanding from the other.

### Characteristics

- Colourful and attractive
- More than 100 colours to choose from
- Glossy look also available

### Benefits to End-Users

- Able to differentiate different outlets, months, departments, territories, period (promotion/non-promotion)
- Creates a unique identity
- Increase awareness on promotions more effectively
- To project a premium image and boost brand name recognition
- Unique identification can prevent internal pilferage - stock loss
- A form of control and monitoring system to ensure retailers and/or franchisees use approved thermal receipt rolls

### Benefits to Dealers

- Offer more choices for end users to choose

Dealers can now include Tinted / Coloured thermal paper roll as part of their product range, thus providing more options for end users to choose from.

- Opportunity to increase revenue and profit

Ideal recommendation for end-users, who do not mind paying extra for something attractive and effective in differentiating themselves from others, thus allowing dealers to sell at higher profit margins.

- Avoid losing potential end users

Better option for end-users who want exclusive and unique identity for their thermal rolls and minimise the possibility of losing sales to competitors.

- Unique Selling Proposition

Unique features allow dealers to compete more effectively through product differentiation and make end-users purchase from them rather than from competitors. Allows dealers to focus selling on quality rather than only on price.

- Opportunity for repeat sales

Once the end-users are convinced and agree to use Tinted / Coloured thermal paper rolls, the chances of them to changing supplier is low due to effort and time spent in developing, checking and approving of colour.

- Contract sale

Due to MOQ, most end users are tied to a contract for a period of time.

# Thermal Paper Roll Range

Thermal Paper is a special paper coated with chemicals that changes colour when exposed to heat. Thermal property requirements will vary across the various end users such as retail, banks, restaurants, healthcare settings, ticketing agencies, lottery systems and other businesses where fast, accurate and high volumes of printouts are required. We have a wide range to cater for the different end requirements.

# Thermal Paper Roll Range

## Premium Gold Grade

Introducing SONO-ROLL Long Life Gold range of thermal papers, which offers 7, 10 & 12 years image durability\* and is highly resistant to environmental exposure making it particularly stable and durable with good print-head performance and an attractive price-performance value, SONO-ROLL Long Life Gold range thermal papers are ideal products for those who appreciate clear, durable prints and the compelling advantages of one of the best thermal papers available in the market.

In addition to 7, 10 & 12 years image durability\*, SONO-ROLL Long Life Gold range of thermal papers have very sharp and dark image density up to 1.6dE and above (no white spots) which allows for excellent barcode scannability and does not fade or blur easily. Super smooth paper provides the surface of choice for pre-printing while less paper dust content will prolong printer head lifespan.

**CERTIFICATE**  
inside every box  
(Customisation available)

### 3 Types Of Gold Grade

#### Premium Gold Grade 12 Years *(except against scratches)*

##### Multi Resistant

With up to 12 years image durability\*, SONO-ROLL 12 Years Multi Resistant Gold thermal paper represents the highest level of all-round resistance to heat, oil, alcohol, water, light and particularly against plasticisers (except against scratches)

#### Premium Gold Grade 7 Years

##### Water Resistant

On top of image durability up to 7 years\* . and all round protection against environmental factors, SONO-ROLL 7 Years Water Resistant Gold thermal paper provides exceptional resistance against water for end use applications outdoors or with constant exposure to water. SONO-ROLL 7 Years Water Resistant Gold even protects pre-printing ink from fading smearing when coming into contact with water.

#### Premium Gold Grade 10 Years

##### High Sensitivity

With image durability up to 10 years\*, SONO-ROLL 10 Years Standard Gold thermal paper possesses exceptional image density for clear and sharp prints while providing average protection against environmental factors including heat, oil, alcohol, water, plasticisers and light.

Special Start Mark for premium gold grade 10 years

## Premium Silver Grade 7 Years

Silver Quality Thermal Paper

SONO-ROLL

### Advantages

- Up to 7 years image durability\*
- Various paper thickness available (48gsm to 80gsm)
- Dark & sharp image print out
- Better protection against environmental factors
- High smooth paper surface
- Less paper dust, hence longer printer head life
- Provide standard sensitivity

## BPA Free (Non-Toxic)

### Characteristic

- Bisphenol-A (BPA) Free
- Non-toxic thermal paper - not hazardous to health
- Concern for the wellbeing and health of the end user and consumer

### Advantages

- Up to 7 years image durability\*
- Good image density
- Smooth base paper surface

Note: In Japan, Taiwan and few other countries, all thermal papers used is 100% BPA Free as it is a law.

## Blue Image Thermal Paper

### Characteristic

- Blue colour image
- Unique & refreshing image
- Pre-printed with branding start mark

### Advantages

- Clear and clean printouts for easy reading
- Creates unique identity
- Prevent receipt fraud

Special Start & End Mark

## Standard Grade

### Advantages

- White & better paper stiffness
- Dark & sharp image print out
- Provide standard sensitivity
- Thicker paper for a premium feel
- Competitive pricing

AKIRA

\* Subject to handling and storage conditions stated on specification sheets.

# Woodfree Paper Roll

Our high performance woodfree paper is sourced from premium paper mills for heavy duty printing. A jam-free printing experience with minimum paper wastages and less dust as our process eliminates excess dust from paper surface.

## High White

**SONO-ROLL**

### Advantages

- High quality woodfree paper
- Low paper dust and good stiffness
- Bluish white shade
- Tight roll tension - more paper in roll

## EC White Paper

**Earth Choice**

### Advantages

- FSC certified
- Low paper dust
- No jamming
- Good stiffness - 70gsm thickness
- Good printability for various printers

# Carbonless Paper Roll

Our carbonless paper are designed to deliver multiple copies from transaction dot matrix printers while minimising user's operation cost. Multiple copies available in white, gold, pink, yellow, blue & green . 1st ply 80 gsm thicker paper is also available, it gives consumer a better feel.

## NCR Paper

**SONO-ROLL**

### Advantages

- Suitable for all impact printers
- 1st ply 80gsm thicker paper gives consumers better feel
- Single ply & multiply available in white, gold, pink, yellow, blue & green
- Blue image print out clear, clean & sharp
- Black image available upon request
- Gold color available in carbonise copy
- No capsule break

## Telex Roll

**SONO-ROLL**

### Advantages

- Compatible with all Telex machines.
- Available in bond & multiply carbonless papers

## Watchman Clock Self-Contain Paper Roll

**SONO-ROLL JAPAN**

### Advantages

- Same as original quality
- Blue Image

### Machine

- AMANO PR-600
- 15mm(W) x 12M(L) x Plastic Core

# Label & Ticketing

02

# Label

Labels play an important role in providing information, barcoding, instructions for use and identifying a product, manufacturer, destination or origin. Tele-Paper offers a range of direct thermal and thermal transfer label solutions with specific characteristics for end user applications. The end user's industry includes manufacturing, healthcare, retail, logistics, transportation, food & beverage and other.

Our labels can be supplied in roll, fan fold or sheet form. Depending on your application, label size, die cut, perforation and pre-printing can be customised.

## Direct Transfer Label

### 1. Non-Top Coat Thermal Paper Grade with water resistant

Recommended for applications where wet rub and water resistant to the thermal image as well as pre-printed ink is required. However, resistance to environment exposure and chemicals is not required

### 2. Top Coat Paper Grade with multi resistant

Best applied when surface abrasion is a concern. Excellent resistance to heat, oil, alcohol, water, light, plasticiser and abrasion

### 3. Top Coat Synthetic Paper Grade with multi resistant

*(Special designed for tear resistant and full water proof)*

Recommended for use on speciality requirements where surface abrasion, water proof or tear resistance is required. It provides excellent resistance to heat, oil, alcohol, water, light, plasticiser and abrasion

### Features

- 1D or 2D barcode readable - sharp & clear
- Very smooth and super white paper with high sensitivity thermal coating, thus, able to protect print head with high speed printing
- The glassine release liner makes auto-labelling process workable
- Pre-printing up to 8 colours

## Thermal Transfer Label

### 1. Art Paper Grade

Art paper is a most often used label material in the market. It has a glossy appearance with smooth surface

### 2. Simili Paper Grade

Simili paper is an ordinary paper and least expensive label material. Recommended for a matt, soft and subdued look

*\* In addition to the material mention above, we also supply alternative thermal transfer base materials such as polyester, cenic, yupo and mirrokote upon request. Please contact us for detail*

*\* Subject to handling and storage conditions stated on specification sheets.*

# Label Applications

Warehousing & Carton Label

Baggage Tag

Price Tag

Retail Shelf Display Label

\* All brand names and trademarks are registered trademarks of their respective owners. OEM product names and numbers are for comparison purposes only and do not represent an endorsement from or approval by their owners.

# Ticketing

Many of the everyday activities we engage in such as, parking the car at the shopping mall, to catching the latest action movie at the cinema, or attending a concert or event; requires the use of a ticket.

By utilising the latest technology in printing machinery coupled with sound technical knowledge of the industry (including the option of incorporating various security features to safe guard against counterfeiting and forgery), Tele-Paper not only can meet, but exceed your ticketing requirements for the following applications:

TITO Ticket	Parking Ticket	Entertainment & Entrance Ticket	Q-Matic Thermal Ticket	Betting Slip
				
				

Lottery Ticket	Boarding Pass	Baggage Tag	Scratch Coupon	Cash Voucher
				
				

*\* For more information, please refer to our Sales Representatives*

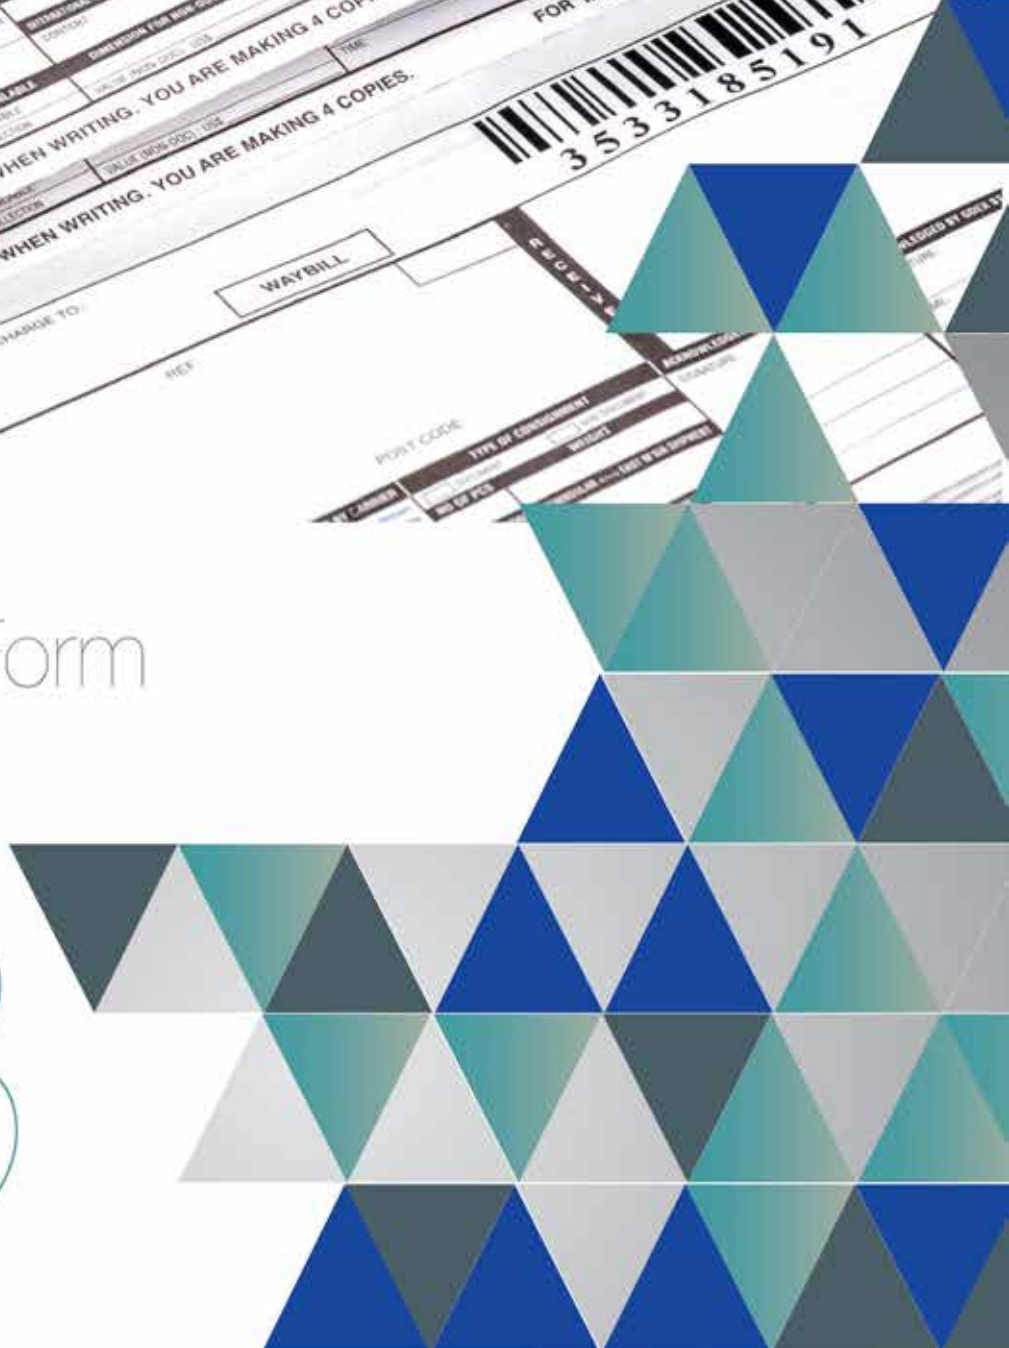

\* All brand names and trademarks are registered trademarks of their respective owners. OEM product names and numbers are for comparison purposes only and do not represent an endorsement from or approval by their owners.

Computer Form

03

# Pre-Printed Computer Form

## Pre-Printed Computer Form

### Advantages

- Whiter & thicker paper quality
- No break in pack
- Sharp & clear image printout up to 7 ply
- "Black" or "Blue" image available for NCR paper
- Available CFB in 45gsm
- 1 st ply available in 80gsm

### Paper Combination Available

- 1 ply 60gsm (Woodfree)
- 1 ply 80gsm (Woodfree)
- 2 ply NCR (All White or White/Colour)
- 3 ply NCR (All White or White/Colour/Colour)
- 4 ply NCR (All White or White/Colour/Colour/Colour)
- 5 ply NCR (All White or White/Colour/Colour/Colour/Colour)
- 6 ply NCR (All White or White/Colour/Colour/Colour/Colour/Colour)
- 7 ply NCR (All White or White/Colour/Colour/Colour/Colour/Colour/Colour)

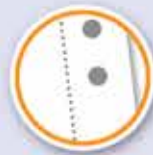

**Proper and clean crimping**

**Serial numbering, barcode printing or variable data with computerized QC checking (water resistant)**

**Low paper dust whiter & thicker paper quality**

**Micro-perforation easier to tear (for 2ply - 7ply NCR)**

**Clean cut side hole, no jamming**

**Printing up to 9 colours**

## Consignment Note

### Advantages

- Clean cut side hole, no jamming
- Dust / dirt removed for cleaner printer & office environment
- Die-cut with different colours
- Printing up to 9 colours, With option for semi glossy ink (whole artwork)
- Good image carbonless paper up to 7 ply
- Minimum dE 0.5 optical density on image of every ply
- Computerised printing if serial numbering and barcode with QC checking (300dpi up to 600dpi)
- Water resistant and no wax layer required

### BACK GLUING OPTIONS

- Variable sizes on back glue / customisation is available
- Normal glue for standard adhesion strength
- Super glue for higher adhesion strength

# Why Buy from Tele-Paper ?

## Low moisture content

(Moisture content reduced to below 4.5% during production)

**Perfect line print out.** ✓  
 Low moisture content = Even paper surface for good quality print  
**TELE-PAPER**

**Defective line print out.** ✗  
 High moisture content = Paper curl (bad print quality)  
**COMPETITORS**

## Whiter Paper Surface

**White.** ✓  
**TELE-PAPER**

**Yellowish.** ✗  
**COMPETITORS**

**Reddish.** ✗  
**COMPETITORS**

## Dust Removal Technology

**Dust & dirt free paper.** ✓  
 good toner adhesion = good print quality  
**TELE-PAPER**

**Dust & dirt.** ✗  
 Bad toner adhesion = bad print quality  
**COMPETITORS**

## Smoothest Paper Surface (Super grade)

**Smooth.** ✓  
**TELE-PAPER**

**Uneven.** ✗  
**COMPETITORS**

## Good Toner Adhesion

**Sharper image printout.** ✓  
**TELE-PAPER**

**Image printout not sharp.** ✗  
**COMPETITORS**

## Starting sticker

**Special Starting Sticker for a clean start.** ✓  
**TELE-PAPER**

**normal tape that will turn yellow and damage the paper.** ✗  
**COMPETITORS**

## End Roll

**Free End Roll.** ✓  
 No paper jam  
**TELE-PAPER**

**Fold End Roll.** ✗  
 Paper easily jammed.

**Tape End Roll.** ✗  
 Tape will melt in the printer and damage the drum or printhead  
**COMPETITORS**

## Strong Paper Core

**High strength core with 5mm thickness to ensure the core retains its shape.** ✓  
**TELE-PAPER**

**3mm thin core with low strength that bends easily and adversely affect printer shaft.** ✗  
**COMPETITORS**

## Stopper

**Square Stopper.** ✓  
 To protect the paper & core from damage  
**TELE-PAPER**

**Round Stopper.** ✗  
 No protection for paper  
**COMPETITORS**

## Detailed Barcode Label

**Clear identification of roll size, quantity & barcode.** ✓  
**TELE-PAPER**

**Without product identification.** ✗  
**COMPETITORS**

Super  
Grade

## Advantages

- Super white & super smooth paper
- Available in 80gsm & 100gsm
- Good toner adhesion
- Low moisture, below 4.5%
- Every roll is treated with dust removal process during production
- Pay a little bit more to get a higher quality paper
- No wrinkle on paper
- Individual plastic wrapped to prevent moisture
- End roll without tape will not damage the print head

Sono-Roll

## Advantages

- Available in 80gsm paper
- Stiffer paper
- Good toner adhesion
- Low moisture, below 4.5%
- Every roll is treated with dust removal process during production
- Customised width available
- 4 rolls / box easier to handle & acceptable by end users
- No wrinkle on paper
- Individual plastic wrapped to prevent moisture
- End roll without tape will not damage the print head

Sono-Plus

## Advantages

- Economical grade
- White & Stiffer paper
- Good toner adhesion
- Low moisture, below 4.5%
- Every roll is treated with dust removal process during production
- Customised width available
- No wrinkle on paper
- Individual plastic wrapped to prevent moisture
- End roll without tape will not damage the print head

# Tracing Paper

## Tracing Paper Roll

### Advantages

- Suitable for digital & inkjet printer
- Paper weight 112gsm
- Good toner adhesion
- Wrinkle free paper
- Individually packed in plastic bag to keep out moisture
- Free end roll without folding, glue or tape to prevent damage to the printer

## Tracing Paper Sheet

### Advantages

- One box consist of 2 packs of 125 sheets per pack, convenient for dealer to resell
- Hard cover & double layer box to prevent moisture, easy handling & storage
- A4 size sheet form available in 2 packing 100's & 250's

Thermal Fax Paper

06

# Thermal Fax Paper

# SONOFAX® JAPAN

## Premium Grade Thermal Fax Paper - Super 10 Years

### Advantages

- Image lasts up to 10 years\*
- Paper weight up to 80gsm
- Extra white for sharp contrast
- High sensitive for good printability
- Anti-curl to avoid recurling back into fax machine & easy filing
- Highlighter friendly
- High image density
- Brand customisation available
- Plastic shrink wrap prevent moisture & water absorption

## Premium Grade Thermal Fax Paper - Super 5 Years

### Advantages

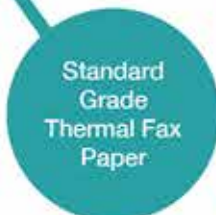

- Image lasts up to 5 years (Subject to storage & handling conditions \*)
- Extra white for sharp contrast
- High sensitivity for good printability
- Good preservation properties for 5 years image retention and save photocopying cost for filing purpose
- Various sizes to suit most thermal fax machines
- Anti-curl to avoid recurling back into fax machine & easy filing
- From Japan

## Standard Grade Thermal Fax Paper

### Advantages

- Get more pages of print out in 1 roll
- Cost per page cheaper (based on A4 size)
- High sensitive thermal paper producing dark & sharp images
- In various paper grammage (53gsm to 80gsm)
- Brand customisation available
- Plastic shrink wrap prevents moisture & water absorption

\* Thermal papers should be stored indoor at temperatures between 18°C - 24°C and with a relative humidity of 40% - 60%. Avoid direct sunlight, fluorescent and similar UV light sources. Thermal papers should not come into contact with plastic folders, plasticisers, solvents and alcohol.

Thermal Transfer / Dot  
Matrix Ribbon

# Barcode Ribbon

Barcode ribbon is not only used to print barcodes, but also numbering, logos, text, symbols, etc. Barcode technology today has helped businesses to minimise data printing errors, speed up the labelling process and reduce cost.

There are 2 types of barcode printer technology categorised by the type of print-head:

1. Flat head – for normal speed printing
2. Near edge – for high speed printing

## Core Notch

Sono-Roll Brand Barcode Ribbon

Barcode Ribbon (With Blue Starter)

Barcode Ribbon Standard

Barcode Ribbon roll to left

Barcode Ribbon roll to centre

## Compatible barcode printer brands in the market:

- Zebra, Sato, TEC, Argox, Clever (TSC), Godex (Taiwan), Ricoh (Japan), Meto, Monarch (US), Printronix, Datamax, Eltron, Intermec, Protec, Citizen, etc.
- Barcode ribbon specifications depend on printer type

## Wax Type

Wax barcode ribbon is commonly used for standard applications on a wide variety of label stocks. It is composed of high percentage of wax based materials with a low melting point that reduces print head energy requirements to extend print head life span.

### Common Applications:

- General purpose labels
- Shipping, warehousing and receiving labelling
- Retail tags and label applications
- Ticketing

### Common Substrates:

- Uncoated paper tags, coated paper tags and labels

\* Used when scratch resistance and durability are not required but costs is the main issue.

## Wax Resin Type

Wax Resin barcode ribbon is composed of a mixture of both wax and resinous materials that require a higher melting point compared to wax ribbon, making the print out more durable than wax ribbon. Wax Resin barcode ribbon's exceptional print quality is suitable for complex label formats, rotated and 2D barcodes, logos and graphics.

### Common Applications:

- Shipping, warehousing and receiving labelling
- Bagging machines
- Medical and pharmaceutical labelling
- Frozen products labels

### Common Substrates:

- Coated paper tags and labels
- Polyethylene (PE)
- Polypropylene (PP)

\* Best applied when scratch and smear / mild chemical durability is required.

## Resin Type

Resin barcode ribbon is designed for harsh environment labelling applications. It provides superior resistance to abrasion, steam, heat and a variety of chemicals including gasoline, alcohol, engine oil, etc.

### Common Applications:

- Textiles
- Chemical drum labelling
- Medical and pharmaceutical labelling
- Dry cleaning labels

### Common Substrates:

- Polyethylene (PE) and polypropylene (PP)
- Polyester and vinyl

\* Used when durability is absolutely needed.

# Colour Wax & White Resin Barcode Ribbon

Colour wax available in Blue, Green & Red.  
Resin available in White

# Date Printing Ribbon / Coding Foil

## Slitting requirements:

- Finished roll width have to fully utilise jumbo roll width
- Minimum order quantity is 2 runs per order
- An additional 10% charge for any lengths below 200m
- Balance ribbon from the jumbo roll (per order) to be absorbed by the customers
- Tele-Paper reserves the right to change the jumbo roll width without prior notice
- For accurate quotation, please submit sample. Otherwise provide full details of :
  - 1) ribbon type
  - 2) printer model
  - 3) ribbon size (width x length)
  - 4) core size & notch
  - 5) face in or face out
  - 6) 1 or 2 core per rolls
  - 7) left or centre winding (depending on machine model)

# Dot Matrix Ribbon

## Ribbon type:

- Nylon Printer Ribbon
- POS / Cash Register Ribbon
- Twin Spool Ribbon
- Correctable Ribbon
- List Off Tape
- Ink Roller

# Medical Chart Paper

With more than 28 years of manufacturing experience in thermal paper products, SONOFAX is the largest medical chart paper and video printer paper manufacturer in the ASEAN region.

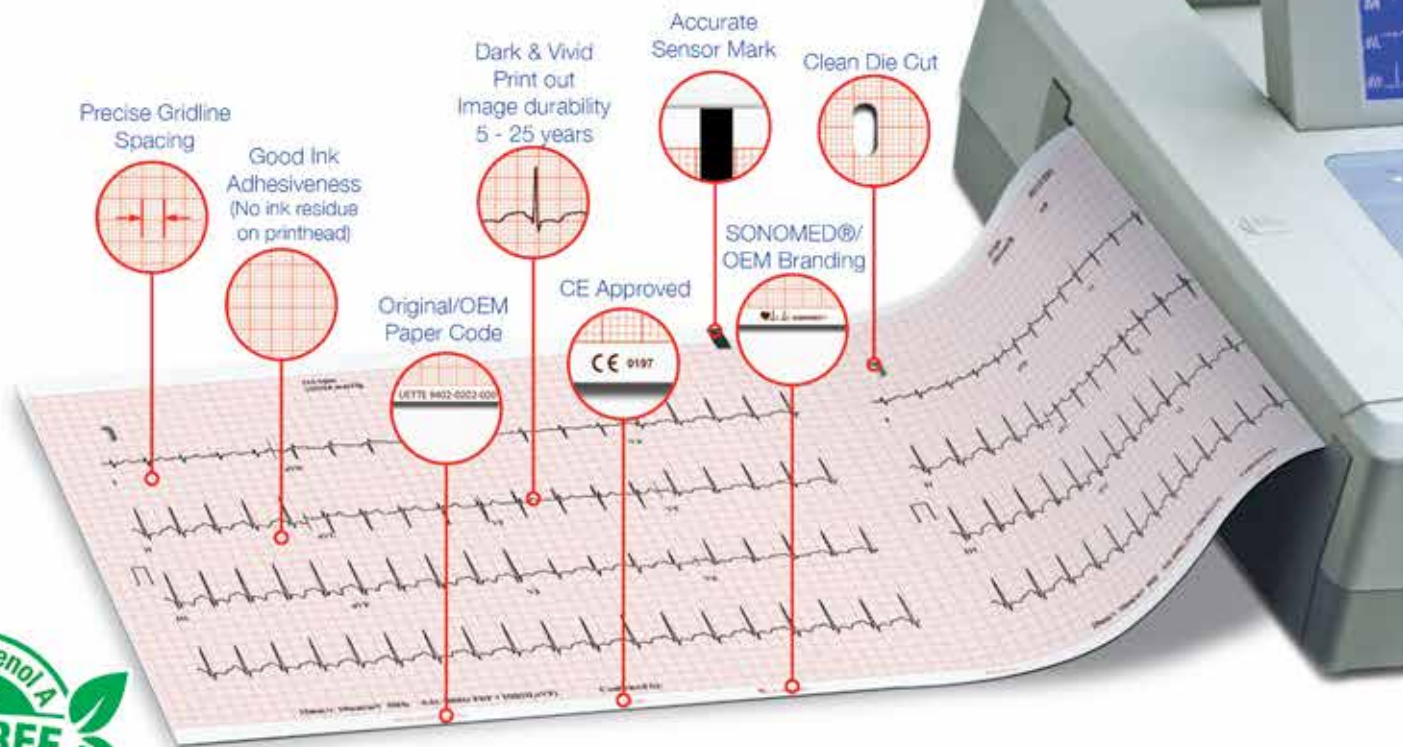

Trusted & Exceeding Expectations Worldwide

## Features

- Trusted brand name with global presence
- More than 180 paper types, compatible for use on most major machine brands
- Premium grade thermal paper
- Long life grade - image durability of up to 25 years
- Consistent quality and supply reliability
- Ex-stock available for fast delivery by sea and air
- Packing in low dust and hygienic environment
- Attractive, neat and secure packing

Hologram for brand authentication

- Straight Z-Folding
- Attractive, neat & secure packing
- Informative artcard
- Beware of imitation or fake Sonomed products

# Ultrasound Gel

**ISO 13485  
Ultrasound Gel  
manufacturer in  
Malaysia**

Sky Gel® & Sonomed Gel® have dual viscosity formulation which can be applied as lubricant and scans as a fluid. The unique water based formulation makes it friendly with all ultrasound apparatus. Scanning images are clear and sharp as the unique formulation maximises the level of conductivity with least interference. Sky Gel® & Sonomed Gel® promotes accurate diagnosis with sharp and vivid scans.

5kg Kettle

## Features:

- Manufactured with filtered water
- Unique water-based formula suitable for use across all ultrasound apparatus
- Bacteriostatic (reduce risk of bacterial contamination)
- Water soluble
- Hypoallergenic (non-irritating to skin)
- Excellent lubrication and glide properties
- Greaseless, Odourless and non-staining
- Salt and alcohol free
- Spread evenly without drying up
- Highly acoustically conductive formulation
- Scanned images are clear and sharp as the unique formulation maximises conductivity with least interference

- OEM and customisation are welcomed

# Sky GEL®

260g e Packing

Scan Here to  
access our filling  
guide video

- Accurate diagnosis based on sharp and vivid scans
- Dual viscosity formulation makes Sky Gel a lubricant as well as a scanning gel
- Ingredients are halal certified
- Convenient and recyclable packaging
- Dispenser pack comes with handle for easy handling and convenient snap-top design cap

## Packing Unit:

- 260g e / bottle (9.17oz), 24 bottles / carton
- 5kg / kettle (176.5oz), 2 kettles / carton
- OEM and customisation are welcomed

Customisation available upon request.

# ECG Gel

# Sky GEL®

## Introducing Sky Gel ECG Gel

**SKY GEL® ECG gel** is a water based conductive gel with high conductivity properties. **SKY GEL® ECG gel** is formulated with high viscosity and is specifically intended to reduce resistance between skin and electrodes in most Electrocardiogram processes. It is also designed to transmit weak electrical signals in a highly precise manner. The high conductivity remains constant even during long procedures.

**SKY GEL® ECG gel** contains harmless ingredients and preservatives that are non toxic and has passed toxicology test by independent third party testers.

**“We are the first ECG gel manufacturer in Malaysia with compliance in ISO 13485”**

### Features:

- Skin friendly
- Bacteriostatic (reduce risk of bacterial contamination)
- Water soluble
- Easily wiped off with towel or tissue
- Odourless
- Does not stain
- Alcohol free
- Dermatologically tested
- Soft bottle for easy dispensing
- Customisation available in adding Aloe Vera-scented

### Packing Unit:

- 260g e / bottle (9.17oz), 24 bottles / carton
- OEM and customisation are welcome

# Sky Gel Hand Sanitizer

## Benefits And Features:

- HALAL Certified
- Fast drying
- Moisturising
- Microbial tested
- Standard scent: Crème Rose
- Excellent effect
- No rinsing required
- Non staining
- Customisation of scents available in Lily Flower Hydro, Dome Prune Sakura Hydro and Orange. This feature adds a calming effect as well as a pleasant fragrance for the user. We can vary the intensity of the fragrance
- Convenient and recyclable packing

## Areas Of Use:

- Wellness Centers
- Healthcare Centers
- Public Areas
- Education Centers
- Government Sector
- Banks
- Hotels
- Public Transportation
- Airports
- Supermarkets
- Food Services

# SkyGel® Hand Sanitizer

Quick drying, soothing and moisturizing

- No Rinsing • Microbial Tested

**SKY GEL®** is an important weapon in the ever more serious fight against pathogenic bacteria. **SKY GEL®** instant hand sanitizer has been developed to meet the requirements of being completely effective, yet quick-acting. An adequate level of alcohol has proven bactericidal effectiveness. These advanced formulations make **SKY GEL®** equally suitable for many medical and care service applications. In fact, it can be used anywhere there is a risk of cross-infection from hand contact. The convenient waterless application of **SKY GEL®** is ideal as it provides antiseptic sanitizing capability in situations where water is unavailable.

Jumbo Roll

# Jumbo Roll

Tele-Paper makes a wide array of products for various industries ranging from retail, banking, gaming, transportation (land, sea and air), entertainment, medical, stationery, labelling, ticketing and utilities. As such, our thermal, wood-free and carbonless paper are available in various thickness and quality properties to cater to needs of different end use applications.

## Thermal Jumbo Roll

### Industrial grades including:

- Standard thermal paper
- Long life thermal paper
- Water resistant thermal paper
- Multi resistant thermal paper
- Top coat thermal paper
- Top coat synthetic thermal paper
- BPA free thermal paper
- Blue image thermal paper
- FSC certified thermal paper

Being one of the largest manufacturer in South East Asia, Tele-Paper's economies of scale has given us a competitive advantage in offering our jumbo rolls at very competitive prices. We are able to support in small order volume and customise the size of the jumbo rolls according to your requirements. Our strategic location situated near to the main seaport also enables us to deliver goods within short turnaround time. Ready stocks are available for urgent orders.

With proven track record and extensive industrial experience, we have a dedicated team of professionals to assist and advise customers, prescribing material types or grades to best suit the application requirements.

Samples are available for evaluation upon request (subject to stock availability)
